

MAKING BUTTONS

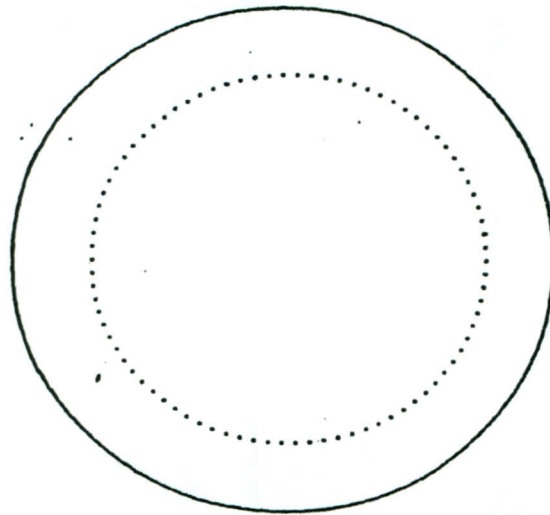

1) Create your button design within the circles below. It is important to stay within the **dotted** lines.

2) Choose your first, second and third choice. Sometimes the button maker machine messes up a button so it helps to have another design to use.

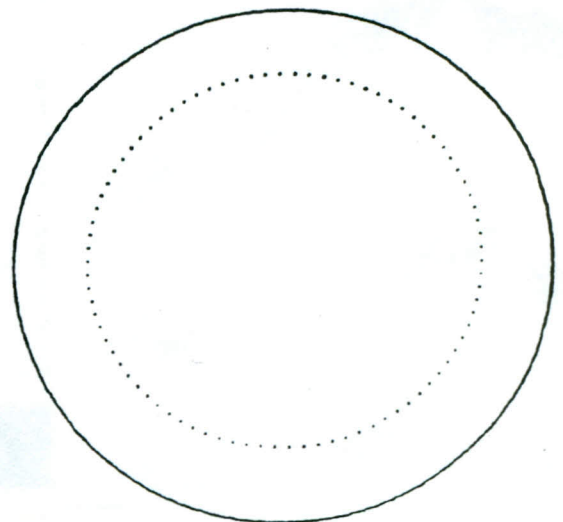

3) **Do not cut out the circles.** There is a gadget that cuts out circles in the perfect size for the button maker machine.

4) Write your **name**.

Teachers:
Use this sheet as
